The Divisions of Public Health Sciences and Female Pelvic Medicine & Reconstructive Surgery at Washington University School of Medicine are seeking applications for a Postdoctoral Fellowship in prevention and health outcomes research training in women’s health with a focus on female lower urinary tract disorders.

**MAKE AN IMPACT!**

Focus on often overlooked female lower urinary tract disorders, e.g., childbirth-related conditions, urinary incontinence, bladder pain, and recurrent urinary tract infections. Training will be accomplished through an immersive, yet flexible, program designed to provide fellows with the research methodology, clinical exposure, and track record of productivity to succeed.

**TRAINING INCLUDES:**

- Individualized mentorship from a vibrant group of successful faculty
- Didactic training in research methodology
- Access to patients and data from local and national leading studies
- Clinical exposure through operating room and outpatient clinic shadowing
- Opportunities to develop and apply for research grants
- A multi-faceted career development program
- Up to three years of support with competitive benefits

**APPLY ONLINE...**

Applicants with an MD or PhD from diverse backgrounds, including Epidemiology, Economics, Psychology, and others related to prevention and health outcomes research, are encouraged to apply. Prior research experience in women’s health conditions is NOT required. Applicants must meet NIH T32 grant funding eligibility requirements (U.S. Citizen/permanent resident).

**SEND INQUIRIES TO:**

The Training Directors: Siobhan Sutcliffe, PhD, sutcifles@wustl.edu, and Jerry Lowder, MD, MSc, lowderj@wustl.edu; or the Program Coordinator: Julie Emmerich, ejulie@wustl.edu.

Applications will be accepted on a rolling basis. Fellowship openings beginning July 1, 2022.
